

The WATER Coalition

The WATER Coalition represents a broad cross-section of plumbing and irrigation contractors, manufacturers and wholesalers, retailers, utilities, environmental groups, water efficiency organizations and real estate organizations. The Coalition supports incentives that encourage and support water efficiency retrofit programs such as U.S. EPA's WaterSense program. Not only will water-efficient retrofits create near-term jobs in the plumbing and irrigation industries, but installation of U.S. EPA-certified WaterSense products and services will save consumers money, save billions of gallons of water, reduce energy consumption, and reduce greenhouse gas emissions.
